Congratulations upon your purchase of a Fabuwood kitchen. You have chosen quality and style and we are proud to have brought it to you. We are positive you will enjoy your kitchen. To ensure your cabinets retain their beauty, follow these simple instructions for their care:

Avoid damaging your stains and finish by blotting the cabinet surface instead of wiping when wet.

Be sure to use only mild cleaners when cleaning cabinet surfaces.

Cleaning products should never be sprayed directly onto the wood. Apply product to a cleaning cloth instead.

Damp soft cloths should be used to clean cabinets on a regular basis.

Excess water should be dried immediately to avoid water damage to cabinet finishes.

Food should never be left open in cabinets. Keep food tightly sealed to avoid attracting unwanted guests!

Great organization is key! Invest in some cabinet organizers such as spice racks, modular containers, and labels.
